The first dean of the Faculty for 1962-1974 was Dr. Phys.-Math. Trubenok Alexander Davidovich (1923-2001 years), who gave a lot of energy for its organization and development and simultaneously headed the Department of Precision Mechanics. In 1963 he released the first graduates of engineering. In 1968, the faculty, who then occupied the upper floors of the building shell number 12, opened a new department - "Instrumentation Technology", which provides an educational process technology training for an instrument-making and radio engineering faculties.

Initially, faculty consisted of 4 faculties and it included only 18 teachers, but only about half of them were associate professors, though on each course had 7 academic student groups. In that time lectures on special subjects were invited to teach the leading specialists in the field of instrument with well-known instrument-making enterprises, scientific and educational institutions in Kiev, as well as teachers from schools in Moscow and Leningrad.
