

The **15th International Symposium** is planned to be organized by the Students Scientific Association „Mechanik”, Students Chemical Scientific Association and Students Council of Chemical Faculty of the Gdansk University of Technology on **16-19 May 2012**

All our academic friends– university students, PhD students and graduates of different faculties of chemical and mechanical engineering from Poland and abroad - are being encouraged to take part in the Symposium forward to seeing excellent projects and research presented by young engineers. The aim of the Symposium is to give a chance to young people to present their achievements in an atmosphere of casual and friendly discussion and compare their results. The Symposium jury formed by academic staff members will assist all presentations.

The following principle subject matter of the Symposium is offered:

- Advanced Machine Design and Manufacturing Processes,
- Operation, Maintenance and Diagnostics of Machines,
- Materials Engineering,
- Heat Engineering,
- Production Process Automation and Control,
- Production Engineering and Management.
- Chemical Engineering
- Remediation Technologies
- New and Proecological Materials
- Crystal Engineering
- Synthesis and Research on Bioactive Compounds
- Environmental Analysis and Monitoring
- New Technologies in Food Industry

Agenda and deadlines:

07 February 2012 – Preliminary registration and submission of abstracts

08 February 2012 – Acceptance of subjects

11 April 2012 – Delivering the full-conference fee

16 - 19 May 2012 – 15th International Symposium of Students and Young Mechanical Engineers
